DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claims 1-15 drawn to a method for parallel array synthesis via monomer addition.

Group 2, claims 16-27, drawn to a method of generating DNA via subchain annealing.

Group 3, claims 28-33, drawn to a method of generating an RNA library.

Group 4, claims 34-36, drawn to methods of SNP detection.

Group 5, claim 37, drawn to a method of generating an oligonucleotide library via DNA amplification.

The inventions listed as Groups 1-5 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking groups 1-5 appears to be that they all relate to polymer synthesis.

However, Fodor et al (US 5,445,934, issued 29 Aug. 1995) teaches polymer synthesis via deprotection and monomer addition providing polymers of about 75 monomers (Column 9, line 25-Column 10, line 12). Therefore, the technical feature linking the inventions of Groups 1-5 do not constitute a special technical feature as defined by PCT Rule 13.2 because it does not define a contribution over the prior art.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
